Eligible Improvements / Retrofits	Federal Grant	Ontario Grant	Cool Savings/Heat Savings	Total Grant/Rebates
	SINGLE FAMILY HOME	SINGLE FAMILY HOME		
HEATING SYSTEM				
Replace your heating equipment with:	for 1st system	for 1st system		
an ENERGY STAR qualified gas furnace that has a 90.0% annual fuel utilization efficiency (AFUE) or better	\$300	\$300		\$600
an ENERGY STAR qualified gas furnace that has a 92.0% AFUE or better, and a DC variable-speed motor	\$500	\$500	\$250	\$1,250
an ENERGY STAR qualified oil or gas boiler that has an 85.0% AFUE or better	\$600	\$600		\$1,200
an ENERGY STAR qualified oil furnace that has an 83.0% AFUE or better	\$300	\$300		\$600
an ENERGY STAR qualified oil furnace that has an 85.0% AFUE or better, and a DC variable-speed motor	\$500	\$500	\$250	\$1,250
a CAN/CSA-C448 compliant ground- or water-source heat pump	\$3,500	\$3,500	as an exception (up to \$750)	\$7,000
				\$0
Install an ENERGY STAR qualified air-source heat pump (*per equipment installed)	\$400	\$400	If Heat pump applies, \$350	\$800
				\$0
Install a minimum of 5 electronic thermostats for electric baseboard heater. Electric baseboards must be the primary system. (**for each set of 5 installed)	\$30	\$30		\$60
				\$0
Replace your wood-burning appliance with a model that meets either CSA-B415.1-M92 (Performance Testing of Solid Fuel-Burning Heating Appliances or the U.S. Environmental Protection Agency (EPA) wood-bruning appliance standards (40 CFR Part 60). (*per equipment replaced)	\$300	\$300		\$600
VENTILATION SYSTEM				
Install a heat recovery ventilator that is certified by the Home Ventilating Institute. (See www.hvi.org) (*per equipment installed)	\$300	\$300		\$600
COOLING SYSTEM [Replacement Only]				
Replace your central air conditioner with an ENERGY STAR qualified unit.	\$200	\$200	\$350	\$750
Replace your window air conditioner(s) with an ENERGY STAR qualified unit(s). (*per unit replaced)	\$20	20		\$40
Replace your Central Air Conditioner with a water source heat pump	200	200		
DOMESTIC HOT WATER SYSTEM				
Install a solar domestic hot water system that meets CAN/CSA Standards.	\$500	\$500		\$1,000
Replace your domestic hot water heater with an instantaneous gas water heater that has an energy factor (EF) of 0.80 or better (*per equipment installed)	\$200	\$200		\$400
Replace your domestic hot water heater with a condensing water heater that has an EF of 0.80 or better (*per equipment installed)	\$300	\$300		\$600
Install a drain-water heat recovery (DWHR) system. Grants are based on the length of the pipe installed.				\$0
three quarter (3/4) metre to one (1) metre	*\$50	*\$50		\$0
over one (1) metre	*\$100	*\$100		\$0
(*per unit installed)				\$0
The grant level for DWHR technology relative to the savings and other technologies is currently under review and could be adjusted in the near future. If adjusted upward, grants would be retroactively adjusted.				\$0
